Professional Summary

Computer Science Technology student at Vanier College graduating May 2027. Developing foundation skills in full-stack web and mobile application development, network configuration, and data-driven problem solving. Seeking an end-of-studies internship to apply technical knowledge in a professional setting.

Technical Skills

Programming Languages: PHP, Java, C#, Dart, SQL
Web Development: HTML5, CSS3, JavaScript, jQuery, Ajax, Slim Framework
Development Tools: Visual Studio Code, IntelliJ IDEA, Git, GitHub, Android Studio (Java), NetBeans, Jira
Operating Systems: Windows, Linux/Unix (in progress)
Networking: Routing basics, TCP/IP protocols, Cisco Packet Tracer, Wireshark
Others: Object-Oriented Programming, CI/CD pipeline, DevOps, Agile methodology

Projects

AI Study Assistant – MariHacks Hackathon | *Python (FastAPI), JavaScript, SQLite, Groq API, Tavily API*

- Developed a full-stack AI study platform generating notes, flashcards, quizzes, and personalized study plans from user inputs and uploaded files
- Built a secure FastAPI backend with JWT authentication, rate limiting, file validation, and REST APIs, and integrated Groq and Tavily services

Financial Tracking Application | *Dart, Flutter, Groq API, Firebase, Firestore*

- Developed a personal finance mobile application using Flutter and Dart with an MVVM architecture
- Integrated Firebase Authentication and Firestore for secure data storage, real-time synchronization, and CRUD operations

Beauty Salon Management Web Application | *PHP (Slim), Twig, MariaDB, JavaScript, HTML, CSS, Bootstrap*

- Developed a web application for a real-world beauty salon client using PHP, Slim, MariaDB, and MVC architecture
- Built a responsive frontend and implemented appointment, customer, and service management features while collaborating with a team using Git
